

burkert

A rotork Brand

Fine Controls have been supplying process controls & instrumentation equipment since 1994, & now serves an ever expanding customer base, both in the UK & globally.

We offer a full range of valve & instrumentation products & services, with our product rangerepresenting leading technologies & brands:

Flow: Flow Meters & Transmitters, Flow Switches, Flow Control Valves & Batch Control Systems

Temperature: Temperature Probes & Thermowells, Temperature ransmitters, Temperature Regulators & Temperature Displays

Level: Level Transmitters & Switches

Pressure: Pressure Gauges & Transmitters, Precision & High Pressure Regulators & I-P Converters, Volume boosters.

Precision Pneumatics: Pressure Regulators, I-P Converters, Volume Boosters, Vacuum Regulators

Valves: Solenoid & Pneumatic Valves, Control Valves & Positioners, Actuated Ball, Globe or Diaphragm Valves & Isolation Valves

Services: Repair, Calibration, Panel Build, System Design & Commissioning

NEW PRODUCT BULLETIN

Precision Stainless Steel Fuel Control Regulator

In today's stringent testing of engines, compressors and other equipment, precise control of fuel supply is critical to accurate test results. With its new Model 67 Precision Stainless Steel regulator line, Fairchild offers a tough and durable yet highly precise regulator designed for rigorous and versatile testing applications. The 67PPR has quick change and purging capabilities to facilitate the variety of fuel mixtures used in engine technology. When your application demands high performance and accurate control, insist on the best — Specify Fairchild's New Model 67 Regulators.

Contact your local distributor or Fairchild's Application support team at (800) 334-8422 to discuss the Model 67 and our complete line of precise and reliable pressure control products.

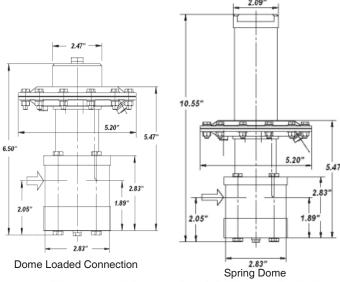

NEW Stainless Steel Precision Fuel Control Regulator

- High Accuracy with Extremely Low Droop Under Flow
- Reliable Fuel Supply to the Engine
- Full Corrosion Resistance for All Fuels and Mixtures
- No change in output with fluctuating supply pressure or downstream pulsation
- Allows Quick Fuel Changeover
- Washdown and Internal Purge Capability

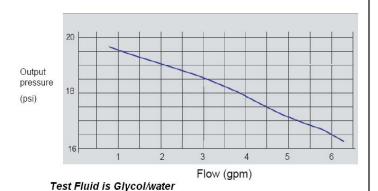

The directly-controlled Model 67 stainless steel regulator precisely controls fuel pressures in ranges from minus 6 to 45 psi. The large diaphragm actuator with directlycontrolled valve gives excellent response characteristics with very low hysteresis. High precision control is achieved by its forcebalanced valve, with a newly developed patented smooth running seal system. Specially developed for the high precision and reliability requirements of modern engine test equipment, the M67 is suitable for all fuels such as gasoline, diesel, biodiesel (RME), aviation fuel, methanol, ethanol, petrol mixtures E5 to EIOO and diesel mixtures B5 to B100.

Pressure/Flow (Liquid)Characteristics

Technical Data

Supply Pressure (P1) 150 psi (10 BAR) Max, 60 psi (5BAR) recommended

Regulating Range (P2) -6 to 45 psi (-0.4 to 3 BAR)

Process Connections 1/2 NPTF internal thread / G1/2

Weight 9 lbs

Temperature -4 ^oF to +265 ^oF (-20 ^oC to 130^oC)

Testing and Inspection According to IEC 60534-4

Pressure Tightness Bubble tight sealing category VI

Materials of Construction

Body and Trim	 Stainless Steel
Diaphragms and Seals	 PTFE, FFKM
Regulator Seat
